Transparent IV Dressing

Breathable Waterproof Long-lasting Comfortable

INTRODUCTION

- High Permeability: avoid skin from soaking;
- Preventing the bacteria invasion: No risk of external infection;
- Waterproof: patient can take shower or tubbing;
- Transparence: wound can be observed any time;
- Softness and comfort: suit for all parts of the body, lower alleries;
- Strong viscosity: adhering to the wound for one week;
- Satefy and convenience: we can paste the dressing faster and accurately as the perfect products structure we designed;
- Variety of sizes: different styles , more choices for clinic use.

Hydrocolloid Dressing

Breathable | Waterproof | Anti-bacterial | Comfortable

INTRODUCTION

- Good absorbency for exudation from the wound.
- Keep the wound moist and accelerate the wound healing; reduce the pain and avoid the secondary damage to the wound.
- Waterproof, permeable and prevent the wound from bacteria outside.
- Excellent elasticity and self-adhesive, easy for application.
- Change the dressing when it turns white.
- Easy for peeling off and it will not stick to the wound and keep patients comfortable.

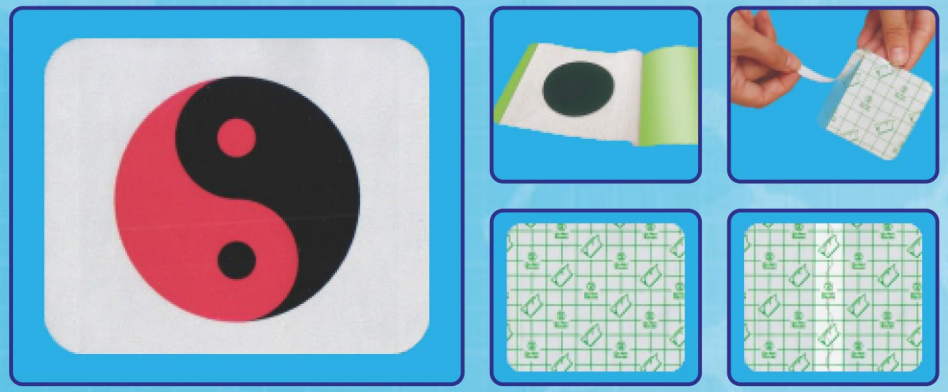
Wound Plaster



Medical Raw Material Roll

INTRODUCTION

Varies materials, for example: Normal type Non-woven Fabric,waterproof non-woven, PU Film and PE Film, PVC Foam ect. with special medical adhesive, low-allergic, strong adhesive and stickness and peel off stength, all of them can be adjusted. Advanced coating technology, with square spot coating, strips coating which can make it more breathable with lower allergic, with leading coating technical in Domestic. All specifications are appliable according to the customer's request.

Double CCK paper complex PU adhesive film

It weights 140g per square meter, and peeling strength can be adjusted according to each customer specific request.

Applied to produce transparent dressing, IV catheter fixing dressing, surgical drape, and wound plaster and band-aids.

PE adhesive film

Polyethylene(PE), good ductility, thickness is 0.018-0.02 mm, Medical pressure sensitive adhesive is 30-35g/m2.

Applied to produce IV catheter fixing dressings, surgical drape, wound plaster base material, band-aid.

PU complex PE adhesive film

PE film as backing material. PU film is 0.025-0.03mm thick, with good ductility and air permeability. Medical pressure sensitive adhesive is 30-32g/m2. Colored edge can be sticking automatically while coating.

Applied to produce transparent dressing, IV catheter fixing dressing, surgical drape, wound plaster and band-aids.

Hot rolled adhesive non woven

spun lance non woven as base material: 45-50g/m2, Medical pressure sensitive adhesive: 30-35g/m2, Glassine paper as release paper: 80-100g/m2.

Applied to produce all kinds of wound dressings, transfusion dressing, wound plaster, heart electrode, etc.

Spunlace adhesive non woven

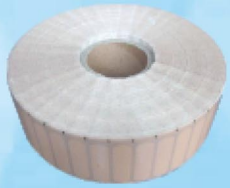
Spunlace non woven as base material: 45-50g/m2, Medical pressure sensitive adhesive: 30-35g/m2, Glassine paper as release paper: 100g/m2.

Applied to produce all kinds of wound dressings, transfusion dressing, wound plaster, heart electrode, etc.

PU complex PET adhesive film (with S cut, easy to be peeled off)

PET as backing material, high brightness, good stiffness. Thickness of PU film is 0.025-0.03mm, with good ductility and permeability, Medical pressure sensitive adhesive is 30-32g/m2.
Applied to produce transparent dressing, IV catheter fixing dressing, surgical drape, wound plaster and band-aids.

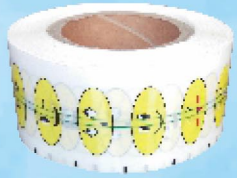
Cuticolor PU acrylic adhesive coating film



Cuticolor PU film is 0.05mm thick, with good ductility and air permeability. Printing on PU membrane. Medical pressure sensitive adhesive is 30-35g/m2.

Mainly applicable for producing new type band-aids.

PU film (cartoon-printed) complex PET coating film



PET film as backing material, with good stiffness and brightness. PU film is 0.02-0.025mm thick, with good ductility and high air permeability. PU film is printed with cartoon pictures. Medical pressure sensitive adhesive is 30-32g/m2.

Mainly applicable for producing new type band-aids.

Cartoon PU acrylic adhesive coating film

PU film is 0.05mm thick , with good ductility and air permeability. Printing on PU membrane. Medical pressure sensitive adhesive is 30-35g/m2.

Mainly applicable for producing new type band-aids.
